PROFESSIONAL SUMMARY

IT Support and Cybersecurity professional with a strong background in security operations, client deployments, and enterprise technical support. Highly skilled in managing SIEM platforms, cloud infrastructure, and Continuous Threat Exposure Management (CTEM) solutions. Adept at automating workflows using Python and Bash, managing diverse multi-platform environments, and resolving complex networking and database integration challenges to ensure seamless and secure business operations.

TECHNICAL SKILLS

Security & Compliance: SIEM, ThreatHawk, Wazuh, Enterprise Firewalls, Vulnerability Assessment, Security Compliance Frameworks

Systems & Cloud: AWS (EC2, S3, IAM), Azure (VMs, Entra ID), Windows Server, Active Directory, Linux, Windows 10/11

Databases & Infrastructure: Oracle 19c DB, Docker, VirtualBox, VMware

Scripting & Automation: Python, Bash

ITSM & Tools: Enterprise Ticketing Systems, Collaboration Platforms, AI Utilities, Identity & Access Administration, Microsoft Office Suite, Workspace Administration

PROFESSIONAL EXPERIENCE

CyberSilo | IT Support Engineer — June 2023 – Present

- Lead technical support and deployment sessions for enterprise clients, managing onboarding, configuration, and troubleshooting within strict SLAs.
- Manage deployment, system requirements, and integration configurations for Continuous Threat Exposure Management (CTEM) and SIEM (ThreatHawk) platforms.
- Configure and monitor security device integrations across enterprise environments, successfully deploying server agents and integrating a variety of industry-standard firewalls.
- Develop and implement a wide range of Python and Bash scripts to automate routine deployment tasks, network troubleshooting, API integrations, and support ticketing workflows.
- Manage security operations, including threat monitoring, incident response, and active alerting.
- Deploy and maintain internal open-source infrastructure, including ticketing system deployments, agent dashboards, and gateway services.
- Author and maintain an extensive array of technical documentation, including system deployment manuals, standard operating procedures (SOPs), knowledge base articles, product training materials, and client query tracking logs.

- Collaborate extensively with development teams to escalate, analyze, and resolve complex platform issues.

Developers Hub | Front-end Developer Intern June 2023 – Sep 2023

- Developed highly responsive web applications and UI components for enterprise clients.
- Engineered and launched multiple e-commerce websites utilizing HTML, CSS, Java, and Python.

EDUCATION

Faran Institutes of Technology (PBTE) 2022 – 2025

Diploma of Associate Engineering (DAE) in Computer Information Technology

University of Gujrat (UOG) June 2023 – Sep 2023

Certification in Web Development

PROJECTS & ADDITIONAL INFO

- **Projects:** Designed and deployed a custom, dark-themed personal portfolio website hosted on Vercel (asadali-cyber.vercel.app).
- **Languages:** English, Urdu, German (B1 Level Preparation).
- **Availability:** Open to relocation for appropriate roles.
